

CLASS SCHEDULING

BOOKING A CLASS SHOULD BE MUCH EASIER THAN TAKING ONE!

From exercise to cooking classes, members are turning to their clubs for more than just traditional club activities. Classes have become a large part of club culture and to help you manage these functions we have developed a simple to use Class Scheduling application. This application provides all the necessary functions including resource booking and tracking, member participation and more.

INSTRUCTOR/CLASS SCHEDULING

Scheduling a class and an instructor can be accomplished in just a few clicks by using the Outlook® style calendar to automatically schedule your classes at expected intervals. In addition, multiple classes can be combined into a course, allowing members to register for the whole series at one time.

USER DEFINED VIEWS

User defined work screens enable each club to customize views and workflow to match their unique requirements.

CLIENT BOOKING SEARCH

With the Client Booking Search, users can click on an individual member to see all of their upcoming registrations at a glance.

CLASS DUPLICATION

Popular classes are typically requested time and time again. Rescheduling for additional classes is as simple as copying the original class and pasting it to the new date(s) in your calendar. All original settings will be copied including instructor, room and equipment.

MEMBERSHIP INTEGRATION

Member information automatically transfers to your Class Scheduling system, enabling fast class scheduling and personalized member service.
