# THE MOBILE POINT OF SALE APP

jonasclub.com | sales@jonasclub.com | 1-888-789-9073

The new Mobile Point of Sale application allows club wait staff to perform several functions that would normally be done at a stationary POS terminal, by way of a mobile device.

Integrated with Jonas Club Software's Point of Sale, our mobile solution reduces the need for wait staff to return to a POS terminal for order placement and chit settlement. This reduces ticket times and improves the kitchen's workflow in your dining facilities.
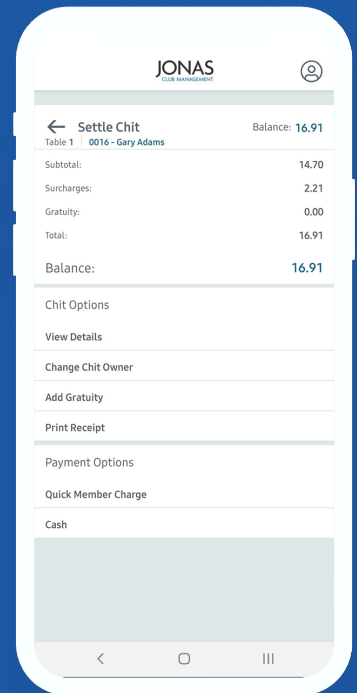

FEATURES

- Designed for handheld devices that fit easily in an apron or pocket

- Optimized layout for mobile and tablet

- User-friendly interface

- Operational even when Wi-Fi or Data connections are lost

- Member search allows for quick chit assignment

- Assign seats to all those at the table

- Use the same device for all dining areas

- Integration with the Kitchen Display System

- Available for Android and iOS devices

POINT OF SALE - ANYWHERE AT THE CLUB

Our Mobile Point of Sale creates POS availability in areas of your club's property that have been unreachable by current POS technology. The solution brings improvement to your club's F&B orders even when Wi-Fi or Data connections are lost or disrupted. As soon as your device reconnects to Wi-Fi or Data, the order will be sent. The beverage cart, outdoor dining, and poolside service are all exemplary locations for the Mobile Point of Sale application.

PERFECT FOR PRO SHOPS

Provide a personal shopping experience for your members with no need to bring items up to the counter for checkout. With the Mobile Point of Sale application, you can settle member purchases right away, add a cart rental at the first tee or turn, and even sell golf balls from the beverage cart.
